

## **The Current Goals of Socialism are Forty-Six**

- 1. Promote Socialism, Demean Capitalism:** Eliminate laws and the popular stigma against socialism. Promote socialism as the best alternative to capitalism. “Once the vast majority makes the decision in favor of socialism,” says [World Socialism](#), “then it will elect socialist representatives or delegates to ... administer the elimination of capitalism and the creation of socialism.”
- 2. Promote the U.N.:** Renew popular support for the U.N. as the only hope for the world. Rewrite its charter so it can establish a single global democracy with its own independent military force.
- 3. No National Boundaries:** Eliminate all borders and national sovereignty. “Socialism will be a world without countries,” says [World Socialism](#). “Borders are just artificial barriers that belong to a past and present that is best left behind.”
- 4. Install Environmental Rulers:** Support U.S. acceptance of a “global green economy” and the U.N.’s World Summit on Sustainable Development. Compel the U.S. to accept the cap-and-trade market for carbon.
- 5. One-world Currency:** Create a new “global currency” to replace the dollar, euro, yen, and all other national currencies. The “global currency” would be managed by a “Global Reserve Bank.”
- 6. Control the Internet:** Form a specialized agency of the U.N. to absorb or replace ICANN (Internet Corporation for Assigned Names and Numbers), and regulate all Internet traffic, prices, and taxes—and censor content according to the ever-changing mandates from U.N. charter nations. Also, mandate construction of wide-area networks covering the entire inhabited world.
- 7. Establish Economic Rulers:** Use the European Union model to create a super-legislature under the auspices of the U.N.’s economic development and social councils. Infuse the super-legislature with power to bypass economic decisions of its member nations, and subordinate to this group all other laws and constitutions.
- 8. Economic Equality:** Use the U.N.’s Declaration on Social Justice to force all nations to guarantee employment, protection, participation, and uniform labor practices regardless of gender, age, race, ethnicity, religion, culture, or disability.
- 9. Rulers’s Law:** Legalize the general use of dictatorial powers by rulers, such as the Executive Order as used in America, to bypass national or constitutional law without checks and balances interference from congress, parliaments, assemblies, or a supreme court.
- 10. Render Congress Irrelevant (U.S.):** Increase the number and powers of regulatory agencies of the executive branch as the primary law-making bodies of the federal government. Bypass Congressional authorization. Instead of seeking permission and approval, obligate Congress to override any new laws and rules enacted by the many agencies with majority votes, a much more time-consuming and debate-intensive process.
- 11. Subordinate Local Government:** Use technical decisions by the courts to bypass the laws and court decisions made by local and state governments. Make all decisions dependent on approval by leaders further up the chain of control.

12. **Destroy Representation (World):** Resist any attempt to allow free elections that dethrone the ruling parties.
13. **Uphold 17th Amendment (U.S.):** Inflame suspicion about repealing the 17th amendment, warning that making senators beholden to the state legislatures will unleash back-door deal making and collusion. Keep this link of representation cleanly severed because it otherwise brings too much control by the people over the federal government.
14. **Deflate Constitutional Convention (U.S.):** Spread fear that a constitutional convention would open the Constitution to a complete re-write and destruction. Hide the mechanics of protection the Founders gave to this act of last resort.
15. **Regulate All Transportation:** Nationalize the transportation industries. Create cooperatives with car and truck makers to force government-mandated levels on fuel efficiency and to meet pollution limits. Expand tax-funded mass transit into all major cities.
16. **Regulate All Energy:** Nationalize energy production and prices using as an excuse the terror of pollution and the fairness of equal access to every nation's natural resources.
17. **Eliminate Private Property:** Adopt the U.N.'s land policy (1976), "Land ... cannot be treated as an ordinary asset, controlled by individuals ... Private land ownership is also a principle instrument of accumulation and concentration of wealth and therefore contributes to social injustice ... The provision of decent dwellings and healthy conditions for the people can only be achieved if land is used in the interests of society as a whole."
18. **Destroy Family Culture:** Encourage the collapse of ties between husband and wife, children and parents, people and church by promoting pornography as a right granted by freedom of speech.
19. **Redefine Normal and Healthy:** Present homosexuality, degeneracy, and promiscuity as a new class of people "normal, natural, healthy." In 2011, the U.S. backed a successful U.N. resolution endorsing certain rights for gay, lesbian and transgender people.
20. **Destroy the Sacrament of Marriage:** In the name of equality, remove all authority from church marriages so only those unions decreed by a clerk of the court according to established laws and requirements, with properly signed papers, may constitute a marriage.
21. **Discredit the Traditional Family:** Dilute natural family structure by compelling by law the acceptance of any union of consenting adults without regard to gender, gender preference, or numbers involved.
22. **Destroy Gender Distinctions:** Compel all institutions to recognize, accommodate, and facilitate any individual regardless of gender or sexual identification. Blur the biological differences between men and women and eliminate any requirements based on that distinction.
23. **Universal Access to Abortion:** Transfer protection of reproductive rights to the U.N. In 2011, the U.N. said "States must take measures to ensure that legal and safe abortion services are available, accessible, and of good quality. ...Criminal laws and other legal restrictions that reduce or deny access to family planning goods and services, or certain modern contraceptive methods, such as emergency contraception, constitute a violation of the right to health." In 2012, Barack Obama obeyed the order by forcing U.S. insurance companies to provide free contraceptives and "day after" abortion drugs, a mandate still under judicial review.

24. **Limit Family Size:** Remove all tax advantages from parents for their dependent children. Promote “responsible” family planning to reduce world population.
25. **Replace God-centered Religion with Humanist Religion:** Infiltrate the pulpits to create a “social religion” that promotes social and political agendas. Inject the mainstream with messages of moral guilt for all aspects of human advancement. Promote a neutral belief system founded on financial and material goals, not God.
26. **Destroy Church Economies:** Eliminate tax-exempt status for church properties and associated employees. Eliminate tax deductions for charitable donations.
27. **Eliminate Cash in the Market Place:** Expand the network of electronic banking into every nation, allowing a digital economy with centralized electronic records to be kept of all transactions; make accessible to appropriate authorities as needed.
28. **International Health Care:** Nationalize health care in every nation and place it under an international board of control. The U.N. World Health Organization said, “In the 21st century, health is a shared responsibility, involving equitable access to essential care and collective defense against transnational threats.” Shared and equitable access means government control.
29. **Supreme World Court:** Expand the international role of a world court system with power to bypass state and national laws and constitutions. Today, it exists in part as the U.N.’s International Court of Justice (also called the World Court), headquartered at The Hague, Netherlands.
30. **Create One-World Super-Legislature over the environment:** Gain control of economic development by gaining control of energy production and the environment.
31. **Environmental Rights Supersede Human Rights:** Lift environmental issues to a level that is equivalent or higher than human rights. Put forward the claim that preservation of the environment for the good of all living things must take priority over human needs.
32. **Nationalize All Natural Resources:** Assume ownership and regulatory power over all national resources regardless of who owns the property on which the resource is found. Use this assumed control to promote ecologically correct choices—low- or non-flush toilets, battery-powered cars, low-energy light bulbs, recyclable containers and packaging, mandatory recycling, low-energy appliances, rationed energy access, and more—all of this mandated by government, not driven by free-market incentives and invention.
33. **Unilaterally Destroy Nuclear Weapons:** Develop the illusion that dismantling all nuclear weapons would be a demonstration of moral strength. In February 2012, President Obama announced he was contemplating destroying up to 80 percent of America’s deployed nuclear weapons.
34. **Neutralize Israel:** Resolve the Israeli-Palestinian issue by U.N. fiat and force Israel to surrender all disputed lands, including half or more of Jerusalem, to the Palestinians.
35. **Nationalize All Industry:** In the name of ecological sanity, grant regulatory authority to the U.N. over all heavy industry such as steel, mining, automobiles, machinery, railroads, airlines, etc.

36. **Sync Animal Rights With Human Rights:** Legalize human rights in animals. Tax meat out of the marketplace. Prohibit all medical testing of animals, and human use of animal products for any purpose. According to a writer for PETA, who was responding to a U.S. judge denying the animal rights organization its petition that the 13th amendment be applied to captive whales: “Women, children, and racial and ethnic minorities were once denied fundamental constitutional rights that are now self-evident, and that day will certainly come for the orcas and all the other animals enslaved for human amusement.”

37. **Infiltrate and Regulate Education:** Get control of the schools. Promote socialism’s goals and ideologies. In 1992, the U.N. adopted Agenda 21 as a blueprint of action to reduce human impact on the environment. Thoroughly indoctrinating the world’s children in how to sustain the environment is one of the U.N.’s mandates for every member nation.

38. **Control Information:** Infiltrate the media. Promote the successes of the new order and disparage the inhibiting drag of the old order. Ridicule the old order, celebrate the new, hide the excesses of the ruling class.

39. **Infiltrate and Regulate Labor:** Unionize all labor at all levels, and rule them by an international body of regulators. Install overseers to ensure that government mandates are obeyed. In 1999, the U.N.’s International Labor Organization declared its purpose to provide “a strong social dimension to globalization [of labor] in achieving improved and fair outcomes for all ... to accelerate progress in the implementation of the Decent Work Agenda at the country level.”

40. **Uphold All Labor as Optional:** Make labor voluntary by providing financial safety nets for unemployment, illness, and retirement.

41. **Discredit the U.S. Constitution:** Re-educate the people regarding the American Constitution to cast it as inadequate and old-fashioned, a hindrance to cooperation between countries worldwide.

42. **Discredit Freedom Heroes:** Discredit America’s Founding Fathers and other heroes of freedom—cast them as elitists whose selfish desires left them no concern for “the little people.”

43. **Rewrite History to Discredit American Culture:** Remove know-ledge about the advances coming out of the Great Enlightenment and subsequent American Revolution, and white-wash U.S. history as relatively insignificant flotsam on the tides of history, an awkward child of the great enlightenment, 1500-1800. Emphasize the rich histories of other countries such as China, India, and Australia.

44. **Promote All-powerful Government Regulation:** Support any movement that seeks government control over education, welfare, mental health clinics, social agencies, the arts, etc.

45. **Install Socialism Everywhere:** For any emerging nation, move quickly to install socialism. Promote it as the most efficient model to achieve political and economic stability.

46. **Legislate by Crisis:** Trigger widespread disorder to justify massive changes in the governments of the world. Use periodic chaos as the means to expand top-down control and restrict personal rights.

**SOURCE:** Essentially Verbatim: Skousen, Paul B.. *The Naked Socialist: The Story of Socialism from its Ancient Roots to Modern Times*, The Naked Series Book 3,

Paperback Edition ([ISBN 978-1-478273-48-6](#)), Copyright © 2012, 2014 by Paul B. Skousen, published by Ensign Publishing Company, Riverton Utah, 584 pages. Also available as an Amazon Kindle eBook ([eBook ISBN: 978-0-910558-72-3](#)). Reference Amazon Kindle eBook pages 557-563.

**ABOUT THE AUTHOR:** [Paul Skousen](#) is a son of [W. Leon Skousen](#) and “studied at Brigham Young University in communications and journalism, and at Georgetown University in national security studies. He worked as a military analyst, trainer, and watch officer for the Central Intelligence Agency, and as an intelligence officer for two years in the White House Situation Room during the Reagan Administration. He and his wife, the former Kathy Bradshaw, are the parents of ten children.”

**OBSERVATION:** The author provided 34 endnotes (numbers 743-777) in support of these 46 goals of socialism. The author also makes several references to [World Socialism](#) – official website for the [World Socialist Movement](#).
